PROJECTS

Full Stack Developer — Videogames App

I carried out this project that involved the development of both the Frontend, Backend, and Database. Front: React + Redux Back: Node.js Database: PostgreSQL and Sequelize. I focused on creating a platform for users to explore Video Games, in addition to collecting information, allowing the creation and storage of custom Video Games.

Full Stack Developer — Inmuebles360

Group Project, which expanded my skills and knowledge, incorporating various tools such as Stripe (Payment Gateway), Cloudinary (Image Implementation), Google authentication, Geolocation (react google maps/api), React, Redux, MongoDB database, and Node.js in the Backend Development. This project is a app for property rental and leasing.
